

NUVEQ CLOUD ACCESS MANAGEMENT PORTAL

EP - CP01

Manage all spaces remotely, anytime,
from anywhere. Modernize your workplace with
remote management capabilities

CONNECT ANYTIME ANYWHERE

Future-Proof, Eco-Friendly Cloud-Based
Access Control For a Sustainable Future

Google Cloud Platform

NUVEQ CLOUD ACCESS PORTAL

ANYWHERE | ANYTIME | ANY DEVICE

The Nuveq Cloud Access Management Portal is an advanced, web-based platform designed to streamline and enhance the management of your access control systems. Offering a centralized hub for all your security needs, this portal allows you to effortlessly oversee and control access points and devices from anywhere in the world.

With its intuitive interface, the Nuveq Cloud Access Management Portal provides real-time visibility into system status and user activities. Administrators can remotely configure settings, manage user credentials, and monitor access events, ensuring that your security operations are both efficient and responsive.

Scalable and user-friendly, the Nuveq Cloud Access Management Portal is the ideal solution for managing complex access control systems, ensuring that your facility remains secure and well-managed at all times.

CORE TECHNOLOGIES

Centralized Control

Manage all access points and connected devices from a single, user-friendly interface, streamlining system administration and enhancing operational efficiency.

Remote management

Manage all access points and connected devices from a single, user-friendly interface, streamlining system administration and enhancing operational efficiency.

Real-Time Monitoring

Receive instant notifications and view live updates on access events, system status, and potential security breaches, ensuring prompt response to any issues.

Multi-Factor Authentication

Advanced security feature requires users to verify their identity through multiple verification methods (OTP) before accessing the portal.

Scalable Solution

Adapt to growing security needs with a scalable platform that supports an increasing number of devices and access points, ensuring long-term flexibility and growth.

Integration Capabilities

Open API technology platform provides greater flexibility and scalability, allowing developers to easily adapt to evolving business requirements and user needs

Automatic Software Updates

Experience future-proof access control that's always secure, and always up-to-date. Automatically updates as new software features and security enhancements become available.

SPECIFICATIONS

Cloud Hosted	Hosted on Google Cloud or AWS, Azure, Private Cloud
Operating System	Linux Ubuntu
Database Supported	MySQL
Client Access	Unlimited
System sizing	Unlimited sites, readers, card holders, administrators, events, inputs, outputs and auxiliary devices
Administrator authentication	MFA (Multi-factor Authentication)
Email & App notifications	Unlimited notifications, configurable by site, user, doors and criteria
Maps and Alarm Monitoring	Separate web page for just alarms and map monitoring
Software/Hardware update	Automatic updates to NUVEQ Cloud Access platform and IoT control panels
Cybersecurity Standards	HTTPS using TLS 1.2 + for all communications, AES-256 + for data encryption at rest
Access control events	Unlimited events stored, viewable for 365 days, accessible in reports based on the NUVEQ Cloud Portal
3rd party integrations	RESTful API interface for information exchanges.
Credential support	Wide array of credential formats 125 kHz prox, 13.56 MHz NFC and Bluetooth(BLE) Biometric QR Code
Mobile management	Manage users and credentials View events Unlock doors remotely Lockdown
Events management	Classify, add notes and acknowledge events
Device management	device status, momentarily unlock and override doors
Additional capabilities	elevator control up to 80 floors per elevator reader 60 custom data fields Fire Alarm Integration Anti-passback Door Interlocking
