

TOUCHLESS SENSOR EXIT BUTTON

CLOUD-BASED ACCESS CONTROL SYSTEM | MOBILE ACCESS

EP-NTB310/330

A touchless exit button is a type of device that is used to unlock a door or gate without requiring physical contact. It typically consists of a sensor that can detect the presence of a person or object, and a control panel or other device that is connected to the door lock mechanism.

Touchless exit buttons are commonly used in places where hygiene is a concern, such as hospitals, schools, and other public facilities. They can help to reduce the spread of germs by eliminating the need for people to touch the door handle or push a button.

SPECIFICATION & DIMENSION

Model:	EP-NTB310/330
Dimensions :	115(L) x 40(W) x 25(H)/86(L) x 86(W) x 25(H) mm
Power :	DC12-24V
Output Contact :	NO/NC/COM
Mechanical Life :	500,000 Tested
Mounting Way :	Surface Mount
Material :	1.8mm Thick 304 Stainless steel
Weight :	0.12kg/0.14Kg
Operating Temperature :	-20° ~ 55° C (14°~131°F)
Operating Humidity :	0~95% (relative humidity)
Sensitive Distance :	3-15cm (Adjustable)
Led Indicator :	Blue LED (Standby)/Green LED (Active)
Time delay :	0.3~30s
